BSR/ASHRAE/IES Addendum q to ANSI/ASHRAE/IES Standard 90.1-2019

Public Review Draft

First Public Review (November 2020) (Draft Shows Proposed Changes to Current Standard)

This draft has been recommended for public review by the responsible project committee. To submit a comment on this proposed standard, go to the ASHRAE website at www.ashrae.org/standards-research--technology/public-review-drafts and access the online comment database. The draft is subject to modification until it is approved for publication by the Board of Directors and ANSI. Until this time, the current edition of the standard (as modified by any published addenda on the ASHRAE website) remains in effect. The current edition of any standard may be purchased from the ASHRAE Online Store at www.ashrae.org/bookstore or by calling 404-636-8400 or 1-800-727-4723 (for orders in the U.S. or Canada).

This standard is under continuous maintenance. To propose a change to the current standard, use the change submittal form available on the ASHRAE website, www.ashrae.org.

The appearance of any technical data or editorial material in this public review document does not constitute endorsement, warranty, or guaranty by ASHARE of any product, service, process, procedure, or design, and ASHRAE expressly disclaims such.

ASHRAE, 180 Technology Parkway NW, Peachtree Corners, GA 30092
FOREWORD

The intent of the baseline building design lighting requirements in Table G3.7 is to establish criteria equivalent to requirements in 2004. At that time laboratory classrooms, shop classrooms, and preschool through 12th grade classrooms were not required to have occupancy sensor control. The requirements in Table G3.7 for these area types, in the Classroom/Lecture Hall/Training Room category, reflect this intent. When the area types in Table G3.7 were updated to match changes in Table 9.6.1, a duplicate requirement for laboratory classrooms was included with a more stringent baseline requirement for lighting controls. This proposal removes this duplicate lighting requirement.

This addendum impacts an optional performance path in the standard designed to provide increased flexibility and therefore was not subjected to cost effectiveness analysis.

Addendum q to 90.1-2019

Modify the standard as follows (IP and SI Units)

Table G3.7 Performance Rating Method Lighting Power Density Allowances and Occupancy Sensor Reductions Using the Space-by-Space Method (Continued)
