

**BSR/ASHRAE/IES Addendum ap
to ANSI/ASHRAE/IES Standard 90.1-2022**

Public Review Draft

Proposed Addendum ap to Standard 90.1-2022, Energy Standard for Sites and Buildings Except Low- Rise Residential Buildings

**First Public Review (October 2024)
(Draft Shows Proposed Changes to Current Standard)**

This draft has been recommended for public review by the responsible project committee. To submit a comment on this proposed standard, go to the ASHRAE website at www.ashrae.org/standards-research--technology/public-review-drafts and access the online comment database. The draft is subject to modification until it is approved for publication by the Board of Directors and ANSI. Until this time, the current edition of the standard (as modified by any published addenda on the ASHRAE website) remains in effect. The current edition of any standard may be purchased from the ASHRAE Online Store at www.ashrae.org/bookstore or by calling 404-636-8400 or 1-800-727-4723 (for orders in the U.S. or Canada).

This standard is under continuous maintenance. To propose a change to the current standard, use the change submittal form available on the ASHRAE website, www.ashrae.org.

The appearance of any technical data or editorial material in this public review document does not constitute endorsement, warranty, or guaranty by ASHRAE of any product, service, process, procedure, or design, and ASHRAE expressly disclaims such.

(This foreword is not part of this standard. It is merely informative and does not contain requirements necessary for conformance to the standard. It has not been processed according to the ANSI requirements for a standard and may contain material that has not been subject to public review or a consensus process. Unresolved objectors on informative material are not offered the right to appeal at ASHRAE or ANSI.)

FOREWORD

This addendum modifies the scope of the Standard to cover the installation of electric vehicle service equipment (EVSE).

In July 2022, ASHRAE issued a position document on building decarbonization and its role in mitigating the negative carbon impact of buildings on the environment. ASHRAE states that by 2030, the global built environment must at least halve its 2015 greenhouse gas (GHG) emissions, with all new buildings being net-zero GHG emissions in operation. Increasing stringency and enforcement of energy codes are critical for decarbonization. This addendum supports and furthers ASHRAE goals.

[Note to Reviewers: This addendum makes proposed changes to the current standard. These changes are indicated in the text by underlining (for additions) and ~~striketrough~~ (for deletions) except where the reviewer instructions specifically describe some other means of showing the changes. Only these changes to the current standard are open for review and comment at this time. Additional material is provided for context only and is not open for comment except as it relates to the proposed changes.]

Addendum ap to 90.1-2022

1. PURPOSE

- 1.1 To establish the minimum *energy efficiency* requirements of *buildings* other than *low-rise residential buildings*, and *sites* for
- design, *construction*, and a plan for operation and maintenance; and
 - utilization of *on-site renewable energy* resources.

2. SCOPE

2.2 This standard provides

- minimum *energy-efficient* requirements for the design and *construction*, and a plan for operation and maintenance of,
 - new *buildings* and their *systems*,
 - new portions of *buildings* and their *systems*,
 - new *systems* and *equipment* specifically identified in this standard that are part of a *site*,
 - new *systems* and *equipment* in *existing buildings*, and
 - new *equipment* or *building systems* specifically identified in this standard that are part of *process applications*.

b. criteria for controlling *systems* in the *building* or on the *site* that modify *energy* usage based on communication with *energy* suppliers to facilitate the use of low-emissions energy sources; and

c. criteria for energy transfer infrastructure to support transportation; and

~~d.~~ criteria for determining compliance with these requirements.

...

NOTE: Addendum CA – added [b. criteria for controlling systems in the building or on the site that modify energy usage based on communication with energy suppliers to facilitate the use of low-emissions energy sources; and]

Addendum AA – TPS Changes for GHG Emissions

1. PURPOSE

1.1 To establish the minimum *energy efficiency* requirements of *buildings* other than *low-rise residential buildings*, and *sites* for

a. design, *construction*, and a plan for operation and maintenance; and

b. utilization of ~~on-site~~ *renewable energy resources*.

1.2 To establish requirements that reduce greenhouse gas emissions associated with the operation and use of *buildings* and *sites*.

2. SCOPE

2.1 This standard provides

a. minimum *energy-efficient* requirements for the design and *construction*, and a plan for operation and maintenance of,

6. new *buildings* and their *systems*,

7. new portions of *buildings* and their *systems*,

8. new *systems* and *equipment* specifically identified in this standard that are part of a *site*,

9. new *systems* and *equipment* in *existing buildings*, and

10. new *equipment* or *building systems* specifically identified in this standard that are part of *process applications*;

b. criteria for reducing greenhouse gas emissions associated with the operation and use of *buildings* and *sites*, *systems* and *equipment* identified in Section 2.1a; and

~~c.~~ criteria for controlling *systems* in the *building* or on the *site* that modify *energy* usage based on communication with *energy* suppliers to facilitate the use of lower greenhouse gas -emissions energy sources; and

~~d.~~ criteria for determining compliance with these requirements.
